mas.863 fabclass

.design inspiration

.goals

. machine something large using the wate
  jet or shopbot
. use opensource tools to optimize design
. wanted to continue with the idea of music
  visualization, but perhaps modify the idea
  to be more feasible than initially planned

.components

.1/16" aluminum, waterjet
. hardware from hardware store
. used autocad, 3dStudioMax to create
  models and flyby video
. had to recreate the wires to communicate
  with the computer this week

.images
