Contents

<i>Preface</i>	<i>page</i> ix x
1 Introduction	1
2 Interactions, Units, and Magnitudes	3
2.1 Units	3
2.2 Particles and Forces	7
2.3 Orders of Magnitude	10
2.4 Selected References	12
2.5 Problems	12
3 Noise in Physical Systems	14
3.1 Random Variables	14
3.1.1 Expectation Values	14
3.1.2 Spectral Theorems	15
3.2 Probability Distributions	18
3.2.1 Binomial	18
3.2.2 Poisson	18
3.2.3 Gaussian	19
3.2.4 Central Limit Theorem	21
3.3 Noise Mechanisms	22
3.3.1 Shot Noise	22
3.3.2 Johnson Noise	23
3.3.3 $1/f$ Noise and Switching Noise	24
3.3.4 Amplifier Noise	25
3.4 Thermodynamics and Noise	27
3.4.1 Thermodynamics and Statistical Mechanics	27
3.4.2 Equipartition Theorem	30
3.4.3 Fluctuation–Dissipation Theorem	31
3.5 Selected References	34
3.6 Problems	35
4 Information in Physical Systems	36
4.1 Information	36

4.2	Channel Capacity	40
4.3	The Gaussian Channel	42
4.4	Fisher Information	45
4.5	Information and Thermodynamics	48
4.6	Selected References	49
4.7	Problems	49
5	Computation in Physical Systems	51
5.1	Analog	51
5.1.1	Linear	51
5.1.2	Nonlinear	52
5.1.3	Differential	52
5.2	Digital	52
5.2.1	Logic	52
5.2.2	Computation	53
5.2.3	Complexity	53
5.2.4	Reliability	54
5.3	Fabrication	54
5.4	Selected References	55
5.5	Problems	55
6	Measurement and Coding	56
6.1	Instrumentation	56
6.1.1	Amplifiers	56
6.1.2	Operational Amplifiers	56
6.1.3	Grounding, Shielding, and Leads	60
6.1.4	Bridges	62
6.1.5	Network Analyzers	63
6.2	Modulation and Detection	63
6.2.1	Synchronous Detection	64
6.2.2	Phase Detection and Encoding	66
6.2.3	Spread Spectrum	69
6.2.4	Digitization	73
6.3	Coding	74
6.3.1	Compression	75
6.3.2	Error Correction	77
6.3.3	Channel Coding	79
6.3.4	Cryptography	80
6.4	Sensing	81
6.4.1	Analog Logic	81
6.4.2	Compressed Sensing	82
6.5	Selected References	83
6.6	Problems	84
7	Electromagnetic Fields and Waves	86
7.1	Vector Calculus	86

7.1.1	Vectors	86
7.1.2	Differential Operators	88
7.1.3	Integral Relationships	90
7.2	Statics	91
7.2.1	Electrostatics	91
7.2.2	Magnetostatics	95
7.2.3	Multipoles	98
7.3	Dynamics	101
7.3.1	Maxwell's Equations	101
7.3.2	Boundary Conditions	103
7.3.3	Electromagnetic Units	104
7.4	Radiation and Energy	106
7.4.1	Waves	106
7.4.2	Electromagnetic Energy	108
7.5	Selected References	109
7.6	Problems	109
8	Circuits, Transmission Lines, and Waveguides	112
8.1	Circuits	112
8.1.1	Current and Voltage	112
8.1.2	Kirchhoff's Laws	113
8.1.3	Resistance	113
8.1.4	Power	115
8.1.5	Capacitance	115
8.1.6	Inductance	116
8.2	Wires and Transmission Lines	117
8.2.1	Skin Depth	117
8.2.2	Transmission Lines	119
8.2.3	Wave Solutions	121
8.2.4	Reflections and Terminations	123
8.3	Waveguides	126
8.3.1	Governing Equations	126
8.3.2	Rectangular Waveguides	128
8.3.3	Circular Waveguides	129
8.3.4	Dielectric Waveguides and Fiber Optics	129
8.4	Selected References	131
8.5	Problems	132
9	Antennas	134
9.1	Time-Dependent Potentials	134
9.2	Dipole Radiation	138
9.2.1	Infinitesimal Length	138
9.2.2	Finite Length	140
9.3	Duality and Reciprocity	142
9.4	Antenna Types	145
9.5	Selected References	147

9.6 Problems	147
10 Optics	149
10.1 Reflection and Refraction	149
10.2 Geometrical Optics	154
10.2.1 Ray Matrices	156
10.2.2 Optical Transforms	157
10.3 Beyond Geometrical Optics	159
10.3.1 Gaussian Optics	159
10.3.2 Nonlinear Optics	160
10.3.3 Adaptive Optics	162
10.4 Metamaterials	162
10.4.1 Negative Indices	162
10.4.2 Perfect Lenses	163
10.4.3 Anomalous Dispersion	163
10.4.4 Cloaking	165
10.5 Selected References	165
10.6 Problems	165
11 Lensless Imaging and Inverse Problems	167
11.1 Matched Filters and Synthetic Lenses	167
11.2 Coherent Imaging	170
11.3 Computed Tomography	173
11.4 Magnetic Resonance Imaging	174
11.5 Inverse Problems	176
11.6 Computational Imaging	178
11.6.1 Confocal	178
11.6.2 Near-Field	179
11.6.3 Ultrafast	179
11.6.4 Single-Pixel	179
11.6.5 Light Fields	179
11.7 Selected References	179
11.8 Problems	179
12 Semiconductor Materials and Devices	181
12.1 Quantum Statistical Mechanics	181
12.2 Electronic Structure	183
12.3 Junctions, Diodes, and Transistors	191
12.4 Logic	196
12.5 Beyond CMOS	201
12.5.1 Organic	201
12.5.2 Carbon	201
12.5.3 Single Electron	202
12.5.4 Mechanical	202
12.5.5 Neuromorphic	202
12.5.6 Architecture	203

12.6 Limits	203
12.7 Selected References	205
12.8 Problems	206
13 Optical Materials and Devices	207
13.1 Generation	207
13.1.1 Incandescence	207
13.1.2 Luminescence	209
13.2 Detection	213
13.3 Modulation	218
13.3.1 Polarization	218
13.3.2 Liquid Crystals	221
13.3.3 AOM, EOM	224
13.3.4 Smoke and Mirrors	226
13.4 Selected References	229
13.5 Problems	229
14 Magnetic Materials and Devices	231
14.1 Magnetism	231
14.1.1 Diamagnetism	233
14.1.2 Paramagnetism	234
14.1.3 Ferro-, antiferro-, and ferri-magnetism	236
14.2 Magnetic Recording	241
14.2.1 Magnetic Media	241
14.2.2 Magnetic Recording	242
14.2.3 Recording Systems	244
14.3 Hall Effect	245
14.3.1 Classical	245
14.3.2 Quantum	246
14.4 Spintronics	246
14.5 Selected References	248
14.6 Problems	248
15 Transducers	249
15.1 Many-Body Effects	249
15.1.1 Superconductivity	250
15.1.2 Junctions and Interferometers	253
15.2 Non-Equilibrium Thermodynamics	255
15.2.1 Thermoelectricity	257
15.2.2 Piezoelectricity	260
15.3 Relativity	261
15.3.1 Clocks	261
15.3.2 Time	264
15.3.3 Position	267
15.4 Selected References	269
15.5 Problems	270

16 Quantum Computing and Communications	271
16.1 Quantum Mechanics	272
16.1.1 States and Operators	272
16.1.2 Angular Momentum	278
16.1.3 Density Matrices	282
16.2 Information	285
16.3 Communications	288
16.3.1 Cryptography	288
16.3.2 Circuits	289
16.3.3 Teleportation	290
16.3.4 Error Correction	292
16.4 Computation	294
16.4.1 Searching	295
16.4.2 Transforms and Factoring	297
16.4.3 Simulation	300
16.4.4 Optimization	301
16.5 Experimental Implementations	301
16.5.1 Spins	301
16.5.2 Ion Traps	301
16.5.3 Superconducting	301
16.6 Selected References	303
16.7 Problems	304
 Appendix 1 Problem Solutions	 306
A1.1 Introduction	306
A1.2 Interactions, Units, and Magnitudes	306
A1.3 Noise in Physical Systems	312
A1.4 Information in Physical Systems	318
A1.5 Computation in Physical Systems	323
A1.6 Measurement and Coding	328
A1.7 Electromagnetic Fields and Waves	338
A1.8 Circuits, Transmission Lines, and Wave Guides	346
A1.9 Antennas	350
A1.10 Optics	353
A1.11 Lensless Imaging and Inverse Problems	360
A1.12 Semiconductor Materials and Devices	366
A1.13 Optical Materials and Devices	371
A1.14 Magnetic Materials and Devices	376
A1.15 Transducers	380
A1.16 Quantum Computing and Communications	384
 <i>Bibliography</i>	 389
<i>Index</i>	409
