<i>Preface</i>	<i>page</i> ix x
1 Introduction	1
2 Interactions, Units, and Magnitudes	3
2.1 Units	3
2.2 Particles and Forces	7
2.3 Orders of Magnitude	10
2.4 Selected References	12
2.5 Problems	12
3 Noise in Physical Systems	14
3.1 Random Variables	14
3.1.1 Expectation Values	14
3.1.2 Spectral Theorems	15
3.2 Probability Distributions	18
3.2.1 Binomial	18
3.2.2 Poisson	18
3.2.3 Gaussian	19
3.2.4 Central Limit Theorem	21
3.3 Noise Mechanisms	22
3.3.1 Shot Noise	22
3.3.2 Johnson Noise	23
3.3.3 $1/f$ Noise and Switching Noise	24
3.3.4 Amplifier Noise	25
3.4 Thermodynamics and Noise	27
3.4.1 Thermodynamics and Statistical Mechanics	27
3.4.2 Equipartition Theorem	30
3.4.3 Fluctuation–Dissipation Theorem	31
3.5 Selected References	34
3.6 Problems	35
4 Information in Physical Systems	36
4.1 Information	36

4.2	Channel Capacity	40
4.3	The Gaussian Channel	42
4.4	Fisher Information	45
4.5	Information and Thermodynamics	48
4.6	Selected References	49
4.7	Problems	49
5	Logic and Computation	51
5.1	Logic	51
5.2	Computation	52
5.3	Problems	53
6	Electromagnetic Fields and Waves	54
6.1	Vector Calculus	54
6.1.1	Vectors	54
6.1.2	Differential Operators	56
6.1.3	Integral Relationships	58
6.2	Statics	59
6.2.1	Electrostatics	59
6.2.2	Magnetostatics	63
6.2.3	Multipoles	66
6.3	Dynamics	69
6.3.1	Maxwell's Equations	69
6.3.2	Boundary Conditions	71
6.3.3	Electromagnetic Units	72
6.4	Radiation and Energy	74
6.4.1	Waves	74
6.4.2	Electromagnetic Energy	76
6.5	Selected References	77
6.6	Problems	77
7	Circuits, Transmission Lines, and Waveguides	80
7.1	Circuits	80
7.1.1	Current and Voltage	80
7.1.2	Kirchhoff's Laws	81
7.1.3	Resistance	81
7.1.4	Power	83
7.1.5	Capacitance	83
7.1.6	Inductance	84
7.2	Wires and Transmission Lines	85
7.2.1	Skin Depth	85
7.2.2	Transmission Lines	87
7.2.3	Wave Solutions	89
7.2.4	Reflections and Terminations	91
7.3	Waveguides	94
7.3.1	Governing Equations	94

7.3.2 Rectangular Waveguides	96
7.3.3 Circular Waveguides	97
7.3.4 Dielectric Waveguides and Fiber Optics	97
7.4 Selected References	99
7.5 Problems	100
8 Antennas	102
8.1 Time-Dependent Potentials	102
8.2 Dipole Radiation	106
8.2.1 Infinitesimal Length	106
8.2.2 Finite Length	108
8.3 Duality and Reciprocity	110
8.4 Antenna Types	113
8.5 Selected References	115
8.6 Problems	115
9 Optics	117
9.1 Reflection and Refraction	117
9.2 Geometrical Optics	122
9.2.1 Ray Matrices	124
9.2.2 Optical Transforms	125
9.3 Beyond Geometrical Optics	127
9.3.1 Gaussian Optics	127
9.3.2 Nonlinear Optics	128
9.3.3 Adaptive Optics	130
9.4 Metamaterials	130
9.4.1 Negative Indices	130
9.4.2 Perfect Lenses	131
9.4.3 Anomalous Dispersion	131
9.4.4 Cloaking	133
9.5 Selected References	133
9.6 Problems	133
10 Lensless Imaging and Inverse Problems	135
10.1 Matched Filters and Synthetic Lenses	135
10.2 Coherent Imaging	138
10.3 Computed Tomography	141
10.4 Magnetic Resonance Imaging	142
10.5 Inverse Problems	144
10.6 Computational Imaging	146
10.6.1 Confocal	146
10.6.2 Near-Field	147
10.6.3 Ultrafast	147
10.6.4 Single-Pixel	147
10.6.5 Light Fields	147
10.7 Selected References	147

10.8 Problems	147
11 Semiconductor Materials and Devices	149
11.1 Quantum Statistical Mechanics	149
11.2 Electronic Structure	151
11.3 Junctions, Diodes, and Transistors	159
11.4 Logic	164
11.5 Beyond CMOS	169
11.5.1 printed organic	169
11.5.2 printed inorganic	169
11.5.3 graphene	169
11.5.4 CNT	169
11.5.5 SET	170
11.5.6 mechanical	170
11.5.7 memristors, neural networks	170
11.5.8 defect tolerance	171
11.5.9 spatial	171
11.6 Limits	171
11.7 Selected References	173
11.8 Problems	174
12 Optical Materials and Devices	175
12.1 Generation	175
12.1.1 Incandescence	175
12.1.2 Luminescence	177
12.2 Detection	181
12.3 Modulation	186
12.3.1 Polarization	186
12.3.2 Liquid Crystals	189
12.3.3 AOM, EOM	192
12.3.4 Smoke and Mirrors	194
12.4 Selected References	197
12.5 Problems	197
13 Magnetic Materials and Devices	199
13.1 Magnetism	199
13.1.1 Diamagnetism	201
13.1.2 Paramagnetism	202
13.1.3 Ferro-, antiferro-, and ferri-magnetism	204
13.2 Magnetic Recording	209
13.2.1 Magnetic Media	209
13.2.2 Magnetic Recording	210
13.2.3 Recording Systems	212
13.3 Hall Effect	213
13.3.1 Classical	213
13.3.2 Quantum	214

13.4 Spintronics	214
13.5 Selected References	216
13.6 Problems	216
14 Transducers	217
14.1 Many-Body Effects	217
14.1.1 Superconductivity	218
14.1.2 Junctions and Interferometers	221
14.2 Non-Equilibrium Thermodynamics	223
14.2.1 Thermoelectricity	225
14.2.2 Piezoelectricity	228
14.3 Relativity	229
14.3.1 Clocks	229
14.3.2 Time	232
14.3.3 Position	235
14.4 Selected References	237
14.5 Problems	238
15 Measurement and Coding	239
15.1 Instrumentation	239
15.1.1 Amplifiers	239
15.1.2 Operational Amplifiers	239
15.1.3 Grounding, Shielding, and Leads	243
15.1.4 Bridges	245
15.1.5 Network Analyzers	246
15.2 Modulation and Detection	246
15.2.1 Synchronous Detection	247
15.2.2 Phase Detection and Encoding	249
15.2.3 Spread Spectrum	252
15.2.4 Digitization	256
15.3 Coding	257
15.3.1 Compression	258
15.3.2 Error Correction	260
15.3.3 Channel Coding	262
15.3.4 Cryptography	263
15.4 Sensing	264
15.4.1 Analog Logic	264
15.4.2 Compressed Sensing	265
15.5 Selected References	266
15.6 Problems	267
16 Quantum Computing and Communications	269
16.1 Quantum Mechanics	270
16.1.1 States and Operators	270
16.1.2 Angular Momentum	276
16.1.3 Density Matrices	280

16.2	Information	283
16.3	Communications	286
	16.3.1 Cryptography	286
	16.3.2 Circuits	287
	16.3.3 Teleportation	288
	16.3.4 Error Correction	290
16.4	Computation	292
	16.4.1 Searching	293
	16.4.2 Transforms and Factoring	295
	16.4.3 Simulation	298
	16.4.4 Optimization	299
	16.4.5 Experimental Implementation	299
16.5	Selected References	301
16.6	Problems	302
Appendix 1 Problem Solutions		304
A1.1	Introduction	304
A1.2	Interactions, Units, and Magnitudes	304
A1.3	Noise in Physical Systems	310
A1.4	Information in Physical Systems	316
A1.5	Electromagnetic Fields and Waves	321
A1.6	Circuits, Transmission Lines, and Wave Guides	329
A1.7	Antennas	333
A1.8	Optics	336
A1.9	Lensless Imaging and Inverse Problems	343
A1.10	Semiconductor Materials and Devices	349
A1.11	Optical Materials and Devices	354
A1.12	Magnetic Materials and Devices	359
A1.13	Transducers	363
A1.14	Measurement and Coding	367
A1.15	Quantum Computing and Communication	377
